

## EASA CODE OF BUSINESS PRACTICE

EASA strongly encourages its members to represent the electrical apparatus sales and service industry with the highest quality of business integrity, ability and service by meeting the following guidelines:

1. A member will be financially responsible. He will be able to complete properly and make good his warranties on any job he may undertake.
2. A member will adhere to any warranties which may be adopted by EASA. He will honor any warranties he may make to a customer. He will not assume responsibilities which he cannot realistically fulfill with respect to warranties of materials furnished or services rendered.
3. A member will strive to adhere to all of the standards adopted by EASA.
4. Members will not make secret rebates or arrange special terms to one purchaser which are not granted to all other purchasers in similar circumstances.
5. A member will not misrepresent his business, products or his services.
6. A member will show due consideration for other members and for their ability. He will not attempt to harm another's business through misrepresentation or any other means which would cause loss of good will or reputation.
7. A member or his employees will not initiate direct contact with employees of another EASA member with the objective of enticing them to terminate their present employment. A member may advertise in magazines or newspapers and if an employee of another member's firm answers that ad by personal appearance at that member's place of business, this then would be permissible.
8. A member will adequately provide for the well-being of his employees. He will carry Workmen's Compensation Insurance as required by Law, Public Liability Insurance and such other insurance as may be necessary for the proper protection of his employees and the public.
9. A member will cooperate with fellow members to the best of his ability in sound and lawful projects or programs intended to improve the quality of the industry's service in the public interest.
10. A member will be environmentally responsible at all times and will voluntarily attempt to comply with any and all environmental laws, rules and regulations applicable to the member's business.
11. In order to increase competition by avoiding "monopolies" of basic data required for servicing and repairing electrical equipment, all Active members will promptly make available to other such members, on request and upon payment of a charge not to exceed the reasonable cost of retrieving and providing such information, mechanical and winding data for electric motors, generators, transformers and similar equipment, the exception being when a member firm is quoting on the same equipment.

### INTERNATIONAL ALLIED DUES

Dues .....\$2,009.00

**\* EASA membership renews on an anniversary cycle, so you will renew on the anniversary of your join date. So, if you join EASA in January, your renewal will be due every January.**

Notice: EASA may transmit to a member technical, engineering or other information in the Association's continuing effort to better serve its members. However, the member is responsible for verifying the correctness of such information; EASA makes no warranties respecting the information in such reports, and shall not be liable for any loss or damage as a consequence of the use and reliance upon such reports by the member. EASA will process the data you provide in accordance with its data protection and privacy policy, which is compliant with the European Union (EU) General Data Protection Regulation. For more information, visit [easa.com](http://easa.com).
